Q. How many ways you can acquire DataSource?

1). **DriverManagerDataSource**

2). **JNDI Look upManagerDataSource**

3). all of the above

Solution :
option [1,2] are correct

Attempted :
option [1] is attempted

Q. <bean id="sessionFactory" class=" ">
<property name="dataSource" ref="dataSource" />
<property name="annotatedClasses" value="com.capgemini.entity" />
<property name="hibernateProperties">
<props>
<prop key="dialect"> org.hibernate.dialect.Oracle9Dialect </prop>
</props>
</property>
</bean>

Assuming that the fully qualified class name is give, which of the following class could go into the blank?

1). LocalSessionFactoryBean

2). RemoteSessionFactoryBean

3). SessionFactoryBean

4). **AnnotationSessionFactoryBean**

Solution :

option [4] is correct

Attempted :

option [4] is attempted

Q. No.	Question	Solution	Time(mm:ss)
1	How many ways	Solution	00:12
2	<bean id="sess	Solution	00:46
3	Given the code	Solution	01:12
4	Classes annotated	Solution	01:01
5	Spring's core	Solution	00:20
6	Spring provides	Solution	00:24
7	Which DataSource	Solution	00:19
8	To use repos	Solution	00:25
9	Container-manage	Solution	00:02
10	Classes annotated	Solution	00:03

Q. Given the code snippet below, which of the following statements are true?

@PersistenceContext
private EntityManager entityManager;
public void updateUserProfile(Long userId) {
 User usr = entityManager.find(User.class,userId); // Line 1
 usr.setName("john"); // Line 2
 entityManager.merge(usr); // Line 3
 entityManager.persist(usr); // Line 4
}

1). At line 1 the user instance is a managed Entity (t)

2). **At line 1 the user instance is a detached Entity**

3). **At line 1 the find method will return null if the input userID is not found (t)**

4). **line 3 is mandatory to synchronize the changes done at line 2 to the database**

5). **line 4 is mandatory to synchronize the changes done at line 2 to the database**

Solution :

option [2,5] are correct

Attempted :

option [3,4] are attempted
